- B Motion Detectors
- C Seismic Sensor

Access Control

- A Power-over-Ethernet Access Controller
- A Security Management Platform for Aix/Unix Operating Systems
- B Card Reader

Fire & Life Safety

- A Pull Station
- B Horn/Strobe
- C Remote Annunciator
- D Fire Alarm Control Panel
- E Smoke Detector

Integrated Security Management

- Security Management Platform for Windows® Operating Systems

Video Management

UltraView™ **A C E F G H I J L**

This ultra-high-resolution camera, available in dome or traditional box, captures high detail in challenging lighting conditions. Able to penetrate high-contrast lighting with an extreme wide dynamic range, it offers 95+ dB and 540 TVL resolution.

UltraView™ ATM **B**

Designed for internal ATM installation, this ultra-high-resolution camera is ideal for ATM low-light and backlit environments. It penetrates high-contrast lighting with an extreme wide dynamic range of 95+ dB and 540 TVL resolution.

VisionmaX PVM-20HS **D**

This motion-triggered surveillance tool captures and displays images of customers and comes with a built-in UltraView wide dynamic range camera that switches from digital signage to camera view.

CamPlus™ 2 **K N**

This universal application dome and traditional box camera offers high sensitivity and provides crisp detail in ordinary, contrasting or extreme low-lighting conditions, with up to 540 TVL resolution.

SymSafe™ Pro **M**

The SymSafe family of MPEG-4 Hybrid DVRs captures and stores bank activity and can be used stand-alone or as part of a networked video solution delivering real-time video recording.

ProBridge **M**

Captures ATM and Teller transaction data and associates it with recorded video. Data is searchable by time, date, camera or transaction texts.

Intrusion Management

MAsterMind™ **C**

The leading event management software platform for central stations with proven reliability, scalability, flexibility, high-volume processing power and unique “n-way” redundancy. Its open design allows for legacy systems integration and offers alarm monitoring, service management and Web solutions, as well as integrated intrusion, video, access, telephony, GPS tracking and reporting.

Alliance Security Platform **A**

Featuring a powerful intrusion alarm detection/door control panel, this industry-leading platform is scalable and managed through Alliance Enterprise software package. Unique capabilities include access-card-based arm/disarm and video recording of alarm and access events.

Motion Detector **B**

GE detectors include PIR and microwave technologies for precise range control and detection. Mirror Optic Passive Infrared Motion Sensors provide superior detection and excellent false alarm immunity.

Seismic Sensor **B**

Designed to detect attempts to break into secure areas, GE seismic sensors offer unparalleled protection for vaults, safes, night deposit boxes and ATMs as well as data storage areas and filing cabinets.

Access Control

Picture Perfect™ **A**

Picture Perfect™ is an enterprise-class security management platform that can control, monitor and record bank access activity and integrate access control, alarm monitoring, photo ID and data management.

DirecDoor™ PoE Controller **A**

DirecDoor is the industry's only two-reader and two-door, Power-over-Ethernet IP-connected access controller, allowing doors to be efficiently controlled using on-line access systems.

Transition™ Series Readers **B**

Designed for control of multiple access points, the Transition series is an all-in-one card reader solution, compatible with the major proximity and smart card technologies.

Fire/Life Safety

270-SPO Pull Station **A**

These pull stations feature positive “glass” rod operation providing an easy means for manually initiating a fire alarm event.

Genesis Signal Device **B**

With wall-penetrating audible and full-coverage visible signals, Genesis horn/strobe is the low-profile emergency signal that offers unmistakable indications of a fire alarm.

R-Series Remote Annunciator **C**

These remote annunciators provide bright and easy-to-read status indication and common controls for GE fire alarm control panels.

Intelligent Control Panel **D**

Supporting intelligent smoke detections, control panels come equipped with advanced features normally found only on large-building systems.

Signature Series Detectors **E**

The Signature Series is comprised of advanced, intelligent smoke detectors with multiple sensors that can monitor conditions and react even before smoke is visible.

Integrated Security Management

Facility Commander® Wnx **L**

This end-to-end solution for security applications is a scalable, open, integrated platform for Windows® that integrates access control, video surveillance, alarm monitoring, intrusion and photo ID.

Security is an investment. Peak performance is the dividend.

For financial institutions, especially at the branch level, security systems are an absolute necessity. GE offers a comprehensive solution with a wide breadth of product lines including access control, fire/life safety, intrusion and video systems. In addition, our clients benefit from innovative products exclusively offered by GE. This includes our MAsterMind™ software, the world's preeminent security automation software featuring the industry's only comprehensive open database management system.

Our reliable, field-tested products are designed to meet the most demanding specifications and have demonstrated the kind of success rates you would expect from a global technology leader. With over 25 years' experience in concepting and manufacturing exceptional security equipment, we understand compliance and regulation considerations and work extensively with our clients to make sure each of their specific needs are being met. You can be sure that when GE products and services are at work, you're getting the support of one of the world's most respected companies.
