Government security, fire and life safety to preserve, prevent and protect from the ground up.

Comprehensive solutions from a single source you know and trust.

UTC Fire & Security

A United Technologies Company

Protecting people and securing assets at home and abroad.

UTC Fire & Security is committed to providing the highest level of security, fire and life safety technologies and tools specifically designed for government applications. Recognizing the high standard that must be met to protect these critical areas, our solutions represent some of the most advanced technologies to protect government agents, reduce costs and minimize threats.

A complete product portfolio for integrated security, fire and life safety solutions

Fire and Life Safety
A leader in the industry with a select group of products offering commercial and residential life safety solutions. Products include: fire alarm systems, intelligent smoke detectors and mass notification technologies.

Intrusion and Property Protection
Intrusion alarm systems, detectors and central station software that protect people and property from loss. Related products include: alarm systems that can integrate into central station monitoring.

Video Surveillance
Single source for solutions to monitor activity, manage safety and document evidence for review. Products include: conventional and network cameras, digital and hybrid recorders, IP-based video management software, mobile and intelligent video, monitors and accessories.

Ports
Security management systems allow agencies to monitor and control sites with the ability to integrate key security systems into one simple-to-use monitoring system.

Intelligence
Operating at distances fifty times greater than coaxial, Fiber Transmission Systems deliver optimum connections without radiating electromagnetic pulses or detectable energy. The most tamper-proof communications medium available, fiber optics offers transmission capabilities that are quick, flexible and, most important, secure.

Corrections
With perimeter surveillance and biometric solutions, correctional facilities are effectively managed through integrated security.

Law Enforcement
Evidence-quality video and documentation are critical in today's environment. Remote surveillance can detect and record suspects from multiple locations and stream data to central monitoring.

Customs and Borders
Security management systems like Picture Perfect™ integrate with HSPD-12–compliant readers to protect buildings from unauthorized entry.

Municipalities
Offering intelligent video solutions for traffic control systems, discreet video surveillance and system integration, UTC Fire & Security helps cities protect both people and property.

Embassies
Full-scale while being unobtrusive, solutions include discreet digital cameras and perimeter motion detection systems to help diplomatic staff and their guests feel safe and welcome.

Contract Holder, GS-07F-0450K
UTC Fire & Security is a GSA contract holder, helping provide a safe workplace for federal employees.

GSA

Access Control and Integrated Security Management
Hardware and software to manage access, photo ID credentialing, alarm monitoring and video surveillance; control over intrusion, access, video and communications. Products include: hardware – PIV card readers and keypads, PIV-compliant Transition™ readers, control panels, proximity/smart cards; software – visitor management systems, Alliance, Facility Commander™ Wnx and Picture Perfect.™

System Connectivity
Extensive line of advanced fiber-optic transmission systems delivers high performance with a higher level of security than copper. Product applications include: broadcast and professional video, security, industrial control and transportation.

Key and Lock Management
Systems monitor and manage egress and control access for a wide variety of applications. Products include: automotive, fleet, industrial, real estate.

A better way
to create a safer world

Whether it's at the local, state or federal level, UTC Fire & Security helps government institutions protect people, property and the freedom we all enjoy. Integrating the latest advancements with existing IT equipment, we've helped secure every kind of government application from embassies to military installations to public infrastructure.

With UTC Fire & Security, you have a true partner and GSA contract holder, already approved and integrated into the government purchasing system. This in turn requires less time and saves money, not to mention makes the entire process much easier.

With the broadest variety of product lines in the security industry, we can meet your specific needs in any application, at a competitive price, and deliver the peace of mind that comes from working with a global security leader.

For more information about UTC Fire & Security's national network of Authorized GSA Service Providers, contact a program representative at 1-561-998-6169.
